DETAILED ACTION

Examiner's Statement

1. Applicants' amendments and arguments, filed on 09/15/2005, with respect to Claims 15 and 17-20 have been fully considered. The 35U.S.C.112 first paragraph rejection related to claim 15 and 17-20 has been overcome by amending the specification based on the language directly from the originally filed claim 15.

Allowable Subject Matter

2. Claims 1-15 and 17-22 are allowed.
3. The following is an examiner's statement of reasons for allowance.
 - The prior art fails to teach an apparatus/method of Claims 1, 14, 15, 21, and 22 that specifically comprises the following:
 - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 6,226,269 and US 5,195,093. The improvement comprises that

For claim 1, "wherein said second circuit is configured to replace one or more characters of said first data stream with a predetermined invalid transmission character in response to said first select signal." as recited, and

For claim 15, "wherein said predetermined character is orthogonal to an encoded data and special character set." as recited, and

For claims 21 and 22, "presenting said predetermined invalid transmission character with either a positive or a negative disparity." as recited.

The US 6,226,269 and US 5,195,093 reference teaches all subject matter except for the above features, individually and in combination.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
